OUTLINE OF THE COURSE

Objectives

Full Blast is an exciting and easy-to-use course in English. The main concern of the writers of this course has been to explicitly demonstrate how English is used in real-life situations, thus enabling learners to use it in meaningful contexts. *Full Blast* has been meticulously designed to build learners' ability to communicate their ideas fluently, accurately and confidently.

Goals

Full Blast follows the requirements of the Common European Framework of Reference for Languages (CEF). It aims at achieving the following goals:

- **Communicative** - to help students establish relations, exchange information and express ideas, attitudes and feelings.
- **Socio-cultural** - to help students grasp an understanding of everyday life patterns of their age group. This covers topics such as home, leisure, etc. in the target language.
- **Learning how to learn** - to help students plan their work over a time span and set themselves realistic objectives.
- **Language and cultural awareness** - to help students acquire an understanding of the language and culture.

Syllabus

Full Blast follows the modular approach, which enables students to deal with topics in depth and over a longer period of time. Moreover, the course uses an integrated approach to all four language skills (reading, listening, speaking and writing) in a carefully graded and well-organised, user-friendly syllabus combining functions, structures, vocabulary, pronunciation and communication skills. A building-block strategy has been employed through which every lexical and grammatical item is carefully presented and systematically revised, enabling students to acquire the language naturally and use it in meaningful contexts. Communicative language teaching is viewed as a practical activity rather than a theoretical notion.

Organisation and length of the course

Full Blast 6 Third Intermediate School - Second Semester, the sixth book in the series, effectively meets the needs of learners with a basic knowledge of the English language.

The Student's Book is organised in four modules, each of which is based on a general topic. The modules are well-organised within a steady framework. Each module consists of a cover page, 5 two-page lessons, a two-page round-up section and either a cross-curricular page or a culture page. In this way, students are presented with different aspects of the same topic. The modular approach promotes progress in all dimensions and by the end of the course, students will have been systematically exposed to the functions and structures outlined in the contents. Additionally, they will have been given the opportunity to develop all four skills, having been given adequate practice throughout the book. The precise time needed to complete the course will vary according to factors such as school organisation, class size, learner ability and motivation.

Key features

Certain key features of the book add to the challenging and motivating material of the course:

- **Motivating and contemporary topics** related to the interests of teenagers.
- **Lively dialogues** presenting real spoken English.
- Emphasis on **vocabulary building**.
- **Cross-curricular and cultural** information.
- **The language** used. It is principally British English. However, the writers have taken into consideration the fact that English is spoken as a first, second or foreign language throughout the world. Therefore, students are exposed to linguistic varieties as well as texts and information about various English-speaking countries and cultures.
- **Personalisation activities**.
- Opportunities for promoting **learner autonomy** with learning objectives on the cover pages, learning tips throughout the book, projects and a self-assessment section (Portfolio).

COURSE COMPONENTS

Student's Book including Workbook and

Grammar Book

The **Student's Book** contains:

- A table of contents for the Student's Book presenting the topics, vocabulary, structures, functions and pronunciation as well as the language skills practised in each module and a table of contents for the Workbook and the Grammar Book.
- Four modules. Each module is divided into a cover page, five lessons, a Round-up section and a culture page/ cross-curricular page.
- A speaking section including pair work activities.
- A grammar reference section with useful tables, examples and explanations of the structures dealt with in each module.
- A section with tips helping students to acquire good learning habits inside and outside the classroom and covering areas such as vocabulary, grammar, reading, listening, speaking and writing. Different learning tips are also presented throughout the lessons.
- A word list containing the active vocabulary in alphabetical order per lesson.

The **Workbook** is in full colour and is closely linked with the Student's Book. It consists of eleven pages per module comprising of vocabulary, grammar, communication, reading and writing development tasks and provides students with further practice on all the linguistic items dealt with in the Student's Book. It is recommended that some of the exercises in the Workbook should be done in class but most of them should be assigned for homework. At the end of the Workbook there is a four-page consolidation section where students are able to reinforce and consolidate what they have learnt.

Portfolio: This can be found within the Workbook. The Portfolio is made up of personalised and motivating *projects* as well as a two-page *self-assessment section*. The *projects* can be found at the end of each module and are closely related to the topic of the module. Each project is meant to be done when the module has been completed, hence providing an opportunity for revision and consolidation. Furthermore, students gain confidence and a sense of achievement as they use the language they have acquired in a creative manner.

The *self-assessment section* is meant to be done when the material has been completed. This section enables students to assess themselves and record their progress, and promotes self-awareness of their strengths and weaknesses. It also enables teachers to see whether any remedial work is necessary.

The **Grammar Book** is also in full colour and is designed in accordance with the syllabus of the Student's Book. Each structure is presented in meaningful context and there are grammar boxes where the use and the formation of the grammar structure is presented, along with various relevant rules and notes. There are also carefully graded tasks, as well as communicative, oral and written activities. Lastly, at the end of each module there is a revision section for consolidation. The students are therefore provided with further practice on the structures taught in each module.

Student's audio CD

The **FREE Student's audio CD** includes the vocabulary, dialogues, texts, listenings and pronunciation from the Student's Book and is meant to give Ss extra practice at home. The Student's audio CD tracklist can be found at the end of the Workbook.

Teacher's Manual

The **Teacher's Manual** contains:

- An introduction.
- **Teacher's Notes** for each lesson of the Student's Book. Each lesson includes tables of the functions, structures and vocabulary introduced and useful notes for teaching. These notes provide teachers with a step-by-step guide to each stage of the lesson within a flexible framework that allows teachers to adapt the activities to their own teaching style as well as to the students' needs. Answers to all exercises, transcripts of the listening exercises and the aims for every activity in the Student's Book are also included.
- Ideas for optional activities which help students gain a better understanding of the vocabulary and grammatical structures or forms introduced and provide them with an opportunity for further practice.
- Background notes on different topics which aim at providing teachers with useful information about the texts appearing in the Student's Book.
- Language Plus boxes which give more detailed information about the new linguistic items presented in each lesson.
- The tracks (▶▶ 22 = Track 22) for all the recorded material included on the class CD.
- The **Workbook Key**.
- The **Grammar Book Key**.
- The **Class CD Tracklist**.
- **Pacing charts**.

Class CD

The Class CD includes all the recorded material from the sections in the Student's Book where the symbol  appears.

Test CD / CD-ROM

The Test CD / CD-ROM contains:

- 4 tests corresponding to the modules of the book
- a final test

- keys and transcripts

- the recordings of the listening tasks of the tests.

All the tests include vocabulary, communication, grammar, listening, reading and writing tasks.

The tests can be printed in their original form. However, the teacher also has the ability to add, omit or change the order of the items and/or exercises according to the needs of their classes.

THE STRUCTURE OF THE MODULES OF THE STUDENT'S BOOK

Modules 1-4 (an overview)

Each module consists of a cover page, 5 two-page lessons, a two-page round-up section and a culture or a cross-curricular page. The lessons focus equally on lexis, grammar, language functions and communicative skills. In the first four lessons, the target language (vocabulary, grammar, functions) is presented and practised extensively. In all five lessons, the four basic skills (reading, listening, speaking, writing) and micro-skills are developed in an integrated manner. In the fifth lesson, there is special emphasis on listening, speaking and writing. Furthermore, the round-up pages at the end of each module thoroughly revise the functions, grammar and vocabulary that have been taught in the preceding lessons through exercises, speaking and writing activities, as well as rhymes. The *Now I can* section also included offers students a unique opportunity for self-evaluation. Lastly, the culture or the cross-curricular page at the end of each module is related to the topic of the preceding module.

Cover page

The cover page is the first page of the module. Ss are introduced to the topic of the module through a discussion. Then they are asked to locate five pictures in the module. The purpose of doing so is to create a sense of anticipation. The third section of the cover page is a set of learning objectives. Students read about what they will learn in the module, which increases motivation and helps them become autonomous learners.

Vocabulary

Before students deal with texts or grammar, they are presented with the key vocabulary in order to facilitate understanding and communication. Vocabulary is presented through visual clues which make the presentation more appealing and comprehensible to students. The lexical items presented are always related to the topic of the module and are semantically grouped. Particular attention has been paid to the selection of useful, high-frequency lexis while bearing in mind that vocabulary is not just lexis but also phrases or chunks of language which have the same function that single words do.

Students are further helped to learn vocabulary with the inclusion of useful advice given throughout the book in the form of **tips**.

Reading

Reading can be divided into two parts:

- **Dialogues**

The aims of the dialogues throughout the book are to present vocabulary, structures and functions in context and to expose students to everyday spoken language in meaningful contexts. All the dialogues have been

specially designed to familiarise students with spoken English in a variety of different real-life situations and they can be dealt with as both reading and listening activities. These dialogues rouse students' interest through witty exchanges in up-to-date, modern English, the objective of which is to promote learning in a communicative way. The dialogues are accompanied by a wide range of comprehension activities, such as open-ended questions, True/False exercises, identifying speakers, gap filling, extracting specific information, etc.

• Different types of texts

There is a variety of reading material: factual texts, e-mails, signs and notes, quizzes, magazine articles, surveys, etc. The texts cover a broad range of motivating and contemporary topics and provide students with interesting, multi-cultural, cross-curricular information about the real world. The texts have been carefully selected not only for their language content but also for their interest and appropriateness to the level and age of students this course is intended for. The texts and tasks aim at the development of reading micro-skills with the emphasis on reading for gist and for specific information. Teachers should use the pre-reading questions provided in the Teacher's Manual to introduce the topic of the reading text and facilitate students' further comprehension of it. In the Teacher's Manual there are also post-reading questions which give students the opportunity to expand on the topic of the text and use the new vocabulary to talk about themselves.

Students are further helped to develop their reading skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Grammar

The aim is to present grammar gradually (building-block strategy). In the grammar section, the formation of the structure dealt with each time is presented through clear and straightforward tables, while its usage is illustrated through notes and/or examples. However, as in the vocabulary section, students are actively involved in the understanding of grammar as they are asked to find examples of the particular structure in the dialogue/text in order to see grammar in context. The grammar is presented in more detail in the Grammar Reference section at the end of the Student's Book and is further practised in the speaking and writing activities. The section ends with a simple activity which allows students to use the structure they have learnt in context and teachers to check their students' comprehension of the particular structure. These activities can be completed in class, either in pairs or individually. Students can also use their Grammar Book section for further practice.

Pronunciation

It is important to sensitise students to the different sounds of the foreign language and give them as much practice as possible. The aim is not for students to acquire a native-like pronunciation but to enable them to speak intelligible English. The pronunciation section deals with significant aspects of spoken English in an organised manner and is linked to the language of each module. It is in the form of a listen-and-repeat drill, presenting and providing controlled practice of individual sounds.

Listening

The topic of the listening task is always related to the topic of the lesson. A variety of spoken text types and task

formats have been employed through which important listening micro-skills are developed. The focus is on listening for gist and/or specific information. Therefore, it is always a good idea to have students read through the questions/gapped text, etc. first and make predictions about the possible answers using the prompts given, such as pictures, tables, etc. It is always important to stress that students do not need to understand every word that they hear. After making sure that students have understood the instructions and the language included in the questions, play the CD two or more times if necessary. Elicit answers from students and ask them to justify their answers. Then, if necessary, play the CD again and clarify any points that have not been understood.

Students are further helped to develop their listening skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Speaking

Speaking tasks provide students with further practice on the vocabulary, structures and functions presented and progress smoothly from controlled to freer practice. Students are engaged in meaningful communication and emphasis is placed on communicating for a particular purpose. Students usually work in pairs or groups and perform a variety of real-life tasks (guessing games, role play, surveys, memory games, information-gap activities, etc.). By doing so, the amount of time students speak is increased significantly and cooperation among students is encouraged. In addition, pair work and group work help to lessen students' communicative stress. Verbal and/or visual prompts are always provided to facilitate the students' task. In pair work involving information exchange, each of the two students is provided with different information found in a special section at the back of the book. Though this arrangement may be inconvenient, it is necessary so that the effectiveness and communicative value of the tasks are not compromised.

Students are further helped to develop their speaking skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Writing

Writing is perhaps one of the most difficult skills for students to master. The writer must take many things into consideration: handwriting, spelling, punctuation, paragraphing, purpose, audience, syntax. For this reason, the course has paid particular attention to this skill. Students are introduced to writing smoothly, starting with gapped activities, simple sentences and then moving on to longer texts. The book helps students build up their writing skills by integrating the skills as the writing activities are usually based on the preceding speaking activities. Students are also provided with guidance concerning different types of writing and activities which help develop writing skills. More importantly, students are provided with a model text so they are exposed to a sample of what they have to produce. You can find a recording of all the model texts on the Class CDs. This allows teachers to have Ss listen to the texts while they are reading them.

The writing tasks are particularly suitable for homework, as they give Ss the opportunity to revise the language introduced in the lesson and expand on the topic. Instructions should be explained carefully in class, as it is

important to ensure that students have fully understood what they are expected to do. Students' written work should always be corrected (not during class time) and returned to students in due course. Alternatively, students could work in pairs and correct each other's work before giving it to the teacher. Moreover, students should be familiarised with a correction code, like the one that follows, which will help them identify and correct their own mistakes.

WW : wrong word	A : article
S : spelling	WO : word order
P : punctuation	^ : something missing
T : tense	

Another way to deal with writing is as a cooperative activity. Writing in pairs or groups can be highly motivating for students and incorporates research, discussion and peer evaluation.

Students are further helped to develop their writing skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Round-up

The Round-up pages consist of exercises revising the vocabulary, grammar and communication activities in the corresponding lessons as well as a speaking and a writing activity. Students are asked to work out their score and see how well they have done. There are also self-evaluation charts (*Now I can*) where students can check their progress. These charts give students the opportunity to take responsibility for their learning. They see what they can do with the language they have learnt and evaluate their own strengths and weaknesses. Lastly, every Round-up has a Rhyming Corner. Here students can come into contact with different kinds of rhymes. They are also asked to do an activity, such as completing blanks or circling the correct words before listening to the rhyme. This allows students to develop cognitive skills and also motivates them to listen to the rhyme so as to see if they have guessed correctly.

Culture and Cross-curricular pages

At the end of every module there is a culture or cross-curricular page. This page is related to the topic of the preceding module and further introduces students to different cultures or cross-curricular topics. More multi-cultural and cross-curricular information is included within the modules. Students are not expected to learn the unknown vocabulary they may encounter here.

POINTS TO REMEMBER

- Whether a task is carried out in class or assigned as homework, make sure that students fully understand the rubric and are clear about what they need to do.
- For most activities, it could prove helpful to demonstrate through examples what the task requires them to do, by doing the first item. This is especially recommended in all speaking activities.
- Whenever a task requires understanding gist, the teacher should not explain unknown words, thus encouraging students to focus on gist only. Whenever necessary, however, certain key words that block understanding could be explained.
- Regarding the grammar section, students will feel more confident if unknown words are explained before they do the grammar activities.

- When correcting students' written work, it is suggested that a list of commonly-made mistakes is made. The information gathered could then be pointed out to students orally or in written form on the board.
- When explaining new lexical items, a variety of techniques could be employed such as example sentences, mimicry, definitions, antonyms, synonyms and/or translation.
- Wherever elicitation procedures are required, it should be ensured that each student has the opportunity to speak before corrections are made by the teacher.
- In cases where students are asked to do guesswork, no answers should be revealed before students proceed to the actual task and check their predictions.
- It is advisable that teachers use the students' L1 when necessary (e.g. to initiate a discussion on a topic in order to activate students' background knowledge, to explain grammar rules).

(beep)

Hi! It's Peter here. Why aren't you picking up? Did you leave your mobile at home again? Anyway, I have volleyball practice tonight at half past seven. I know, we usually have practice on Wednesdays, but tomorrow the coach can't make it. So, it has to be today. Could you give me and Mark a lift to the sports centre? We don't have to take Mark home afterwards, because his dad is picking him up. Thanks a lot. See you later!

(beep)

Tim here. I can't believe it! I've been trying to ring you all afternoon, and I can't get hold of you. Anyway, remember that money you lent me for a new mobile? Well, I found my old one this morning at school, so I'm OK. I'll give it back tonight. Also, can you ask John to call me if you speak to him? I think he went sightseeing with my camera this morning and I want to lend it to a friend. Cheers!

(beep)

Hello, it's John. Listen, I need a favour. I borrowed Tim's camera and it got wet in the rain this morning. Now it doesn't work. Could I borrow some money so I can take it to the shop to get it fixed? Please! I'll wash the car for a whole month. The only thing is, Tim doesn't need to know about this. OK? He'll kill me! Thanks. You're the best!

You have no more messages. If you would like to listen to your messages again, press 1.

Peter: Hello, Gary?

Gary: Oh, hi Peter!

Peter: I just got your message. Thanks for the invitation!

Gary: You're welcome. So, are you free?

Peter: Sure! What time are you getting together?

Gary: At about 7.

Peter: OK. See you then!

3 Grammar

Aim: to present *can/could/be able to/may/might/must/can't* and give Ss practice in using them in context

can / could / be able to

- Draw Ss' attention to the first set of examples. Ask Ss to read the sentences and decide what *can*, *could* and *be able to* express (*they express ability*). Point out that *could* expresses general ability in the past and it's the past tense of *can* while *be able to* can be used in almost all tenses.
- Ask Ss to come up with their own examples.

could / may / might

- Read out the example. Draw Ss' attention to the modal verbs and explain to them that in this case *could/may/might* express possibility. Remind Ss that to express lack of possibility we use *may not / might not*, but not *could not*.
- Ask Ss to come up with their own examples.

must / can't

- Draw Ss' attention to the last set of examples. Explain that *must* and *can't* have got different functions here; *must* expresses deduction and *can't* expresses negative deduction. Provide Ss with further explanations if necessary.

- B. Aims:**
- ▶ to give Ss practice in writing a paragraph expressing their opinion
 - ▶ to present phrases that can be useful when expressing a personal opinion
- Allow Ss some time to write their paragraphs.
 - Choose some Ss to read out their paragraphs.

Suggested answer

In my opinion, running at home on a treadmill is much better than running in the park. First of all, if you are at home, you feel more comfortable because you don't depend on the weather. You can exercise any time you want and do something else at the same time, for example, watch TV. In my view, there are a lot of good things about exercising at home. It's easier to run on the treadmill than on the ground, and it's safer, too.

LISTENING TRANSCRIPT

- Interviewer** Hi! I'm here at the *Planet Earth* offices, the home of our country's greenest magazine. And with me I have Oliver Watson, editor of the magazine. Hello, Oliver.
- Oliver** Hello and welcome.
- Interviewer** Tell us a little bit about *Planet Earth* magazine.
- Oliver** Well, *Planet Earth* is one of the most popular magazines in the country. Over 900,000 copies are sold every month. That's almost a million!
- Interviewer** Wow, that's a lot. Now, how did you start in the magazine business?
- Oliver** Well, I used to be a graphic designer.
- Interviewer** For *Planet Earth*?
- Oliver** No, actually I worked for a small sports magazine, and after a few years I became the editor. Then I came here.
- Interviewer** And you turned *Planet Earth* into a very successful magazine. Is it popular with teenagers, too?
- Oliver** Actually, we've found out that younger children, not only adults, read *Planet Earth*.

Interviewer The thing I like about *Planet Earth* is that it doesn't do what other mags do to sell. Other mags give gifts and bags and all sorts of things to try and get people to buy it. But *Planet Earth* just has a free poster and that's it. And still it's very popular.

Oliver Yes, well, we try to write the best stories and make all our interviews interesting. That's what people like, it seems.

Interviewer Great. So, is this where the magazine is designed?

Oliver That's right. Would you like to see where *Planet Earth* is printed? It's not far.

Interviewer OK, why not?

Oliver We print in the building opposite this one. Let me show you.

Interviewer OK, I'll follow you.

LISTENING TRANSCRIPT

Reporter Hi, this week on Science Matters, we're at the National Science Fair. There are lots of amazing things going on here at the moment, but first we're going to meet the winners of the robotics competition. The third prize went to Julian Beckford with this cute little fellow. What's his name, Julian?

Julian This is Robo-butler.

Reporter And what is he designed to do?

Julian Well, he can hear when letters or newspapers arrive through your front door. Then he moves to the door to pick them up, and brings them to you.

Reporter How does he know where you are?

Julian First he makes a sound like this... (beep), so you know he's got something. Then all you do is shout for him and he can hear where you are.

Reporter That's quite amazing. The second prize went to Harry Colsen with his robot, which you can probably hear. Can you turn it off for a minute? Thanks. So, what have we got here?

Harry Well, my robot is a walking radio.

Reporter Really? Why does it walk?

Harry Well, if you don't like the radio station, you can call Radio-Bot and it will come find you. Then, you can use the keyboard to change the station.

Reporter Very useful. Can you watch TV on it, too?

Harry No, it wasn't designed to do that, but I'm building another robot for that.

Reporter Maybe you'll win first prize with that next year. So, on to the first prize. It's called Aqua-bot and Guy Downing is here to tell us what it does.

Guy Basically, it's used for exploring deep oceans. It can swim fast and it has got two cameras, one in the front and one in the back. But the best thing is that it can tell if something is moving nearby, and points its camera at it.

Reporter Incredible. So, do you hope this robot will be able to find new species living down there?

Guy Yes. We still have 95% of the world's oceans to explore, you know.

Reporter You've got a lot of work to do, then. Well done to all of you. And let's move on to another...

- A:** I don't think so. I think that there is a variety of channels and programmes that keep people informed and it's also a very cheap form of entertainment.

Kathy

I don't understand why people always talk about the disadvantages of television and forget about the advantages. We learn about events that are happening at the moment on the other side of the world. We see live broadcasting, live sports, events and so on. OK, there's also the Internet, but not everyone has access, so I don't think we can say that television is useless nowadays.

Mark

Personally, I believe that parents shouldn't allow their kids to watch any TV at all, or at least let them watch very little. Most of the programmes are of low quality and there aren't enough educational ones. Watching TV is a waste of time and it makes children lazy couch potatoes. They just sit around doing nothing when they should be outside playing a sport or something and communicating with other people their age.

John

My parents say that I watch too much and that I'm addicted, but I disagree. I choose what I watch. Some of my friends turn on the TV and forget to turn it off. I'm not like that. Also, they like watching commercials, which is something I hate. They're all lies and there are too many of them. But they do their job. You won't believe how many products my friends buy because they see them on TV and feel they need them.

Carlos

I'm a father of four children and I encourage them to go out and play a lot. However, I find TV quite useful sometimes. For instance, it costs our family £80 to have dinner at a restaurant. Now that's too much for us. We just stay in and watch something on TV instead. Not everything shown is suitable for all ages, but there are quite a few game shows or educational programmes like documentaries we watch.

LISTENING TRANSCRIPT

Last week on 'Round the world in thirty minutes' we visited Scotland. This week we're crossing the Atlantic Ocean to (Scritchh!) in South America. It was Christopher Columbus who discovered this unique place and he called it 'Paradise on Earth'! ...

Located on the northern coast of South America, it meets the Caribbean Sea and the Atlantic Ocean. It's got high mountains, tropical rainforests and hundreds of rivers. The Orinoco, which is South America's third longest river, divides the country into two and finally flows into the crystal clear waters of the Atlantic Ocean. There are also two lakes - Maracaibo and Valencia. Maracaibo is the largest in South America...

The main reason why tourists visit (Scritchh!) is to see the world's highest waterfall, the Angel Falls. From top to bottom, the water falls an incredible 979 metres. That's three times higher than the Eiffel Tower in Paris! People who love nature will also enjoy exploring the 43 national parks which have got spectacular views and amazing rainforest wildlife...

If you visit from October to December, you will see a variety of colourful flowers on the hills of the Andes.

A fascinating country indeed, with beautiful scenery, but that's not all. Those who visit must try some of the local dishes, which reflect South American, Indian, European and even Asian cultures. We recommend 'pabellón', a dish made of black beans, rice, meat and fried bananas. There is also the traditional 'arepas' which is...

There are a few lakes but there aren't any rivers.

Hi Ted,

I'm writing to invite you to the Book Fair on Tuesday. Some friends and I are going and I thought about asking you, too. Would you like to join us?

The Book Fair is taking place at the Northern Lights Conference Centre from 18-24 February, but the boys are only free on Tuesday, so that's when we're going. How about meeting us there at 5 in the afternoon? The tickets cost 10 pounds, by the way. I think it would be a good idea to book the tickets online, because Tuesday is the first day of the fair and it might be sold out. What do you think?

I hope you can make it. If you decide to come, let me know soon.

Waiting for your reply,

Leo

Isabel I know why I had this dream.
Tony I wanted to find out what happened in the end.

LISTENING TRANSCRIPT

Sonia I was walking in a big field and it was a lovely sunny day. I started running down a hill, faster and faster until I took off. I was flying high above the ground, over forests and towns. I kept going higher and higher. It was a wonderful feeling!

Harry I was at school, and I was taking an exam, but I hadn't studied for it. Then the teacher was my uncle and we weren't at school any more. We were at his house. 'Come on, let's go swimming,' he said, but I didn't have my swimsuit with me. Anyway, the water was frozen so we couldn't go, but it was weird because it wasn't cold at all. What can all that mean?

Isabel I was sitting at home watching TV when I noticed something go past the window. I went to look and suddenly I saw a huge eye, looking in at me. Then an enormous arm crashed through the wall. It was just like the documentary about wild animals I was watching earlier that day. I ran upstairs but I felt something following me. I continued running and suddenly, my legs felt really heavy and I couldn't move them. I woke up screaming for help. I'm not watching documentaries again.

Tony I was getting ready to play football, but I wasn't sure which team I was playing for. I followed the other players out of the dressing room and into a huge stadium. Then I realised I was playing for the national team in the World Cup. I was quite nervous, but when the game started, I fitted into the team well and I had loads of chances to score. Unfortunately, I woke up before the end of the match, so I don't know what the score was.

B: Really?
A: Yeah. It was getting dark, and I was completely lost. And then someone called me.
B: How did you feel?
A: I wasn't afraid, but I really wanted to find out what happened in the end. Unfortunately, I woke up.
B: Have you had this dream before?
A: No, just once.

B. Aim: to give Ss practice in writing a description of a dream

- Allow Ss some time to write their descriptions.

Suggested answer

I dreamt that I was in a huge forest with some friends. We were having a lot of fun, talking and walking around. One of my friends was taking pictures of some birds and the others were exploring the area. Suddenly, they all disappeared and I was left all alone. It was a shock. I don't know where they went and why they left. It also started to get darker and darker and I didn't know my way around. I was completely lost, but I wasn't scared. I heard a voice calling my name, but before I could find out who it was and what happened in the end, I woke up.

Rita Sounds nice! So, what do you do during the festival?

Nobuka In my city, people go to the parks, the main streets or even to the mountain for picnics and what we call 'flower watching'.

Rita 'Flower watching'?

Talks, poetry readings, craft displays and many other activities are organised. Camel races are one of the most popular events of the festival and attract thousands of people. Why has Saudi Arabia decided to take measures related to energy? Because the global need for energy is increasing as years go by.

What is energy efficiency? It's a country's ability to cover its energy needs.

Why is Saudi Arabia's idea brilliant? Because it enjoys 230 hours of monthly sunshine, which could be changed into energy.

How much energy is that? It's 7,000 watts of energy for every square metre every day.

Where is the Kingdom's first solar technology farm and how much energy does it produce? On Farasan Island; it produces 500 kilowatts.

What was the problem with Farasan Island and its electricity supply? It isn't connected to the main electricity network, so in the past it took 28,000 barrels of oil per year to cover its energy needs.

Where else in Saudi Arabia is solar technology used? In many 'intelligent' environmentally-friendly buildings like the Al-Midra complex and in the villages of Al-Jubaila and Al-Uyaina.

Bob Yeah, maybe we can do it more often. Now, you must attach this round metal piece to the legs, too.
Jerry OK. Do you like my electric screwdriver?
Bob Yeah, it makes things so much quicker. Just be careful so that you don't hurt yourself.
Jerry Now what?
Bob OK, step three. Take this piece here and attach it to the longer legs.
Jerry Ah, this must be the back of the chair, right?
Bob Yes, it is. Have you got the right screws there?
Jerry I think so. Yes, they're fine.
Bob Now step four. Use these screws to join the back legs to the seat and the front legs.
Jerry Okey dokey.

Liam Calm down. We'll think of something.
Larry Maybe I could find more information online about how to clean it.

B: If I were you, I'd talk to her. I'd tell her that you want to help out, but what she is doing is wrong and unfair. You can't go on doing all the work. You can also suggest studying together so that you both study and share ideas.
C: My friend is upset because I didn't go to his graduation. Can you please give me some advice?
D: Sure. It would be a good idea to buy him a gift and apologise. Sometimes we forget important things. It's part of life. Explain that you didn't mean to hurt him and ask him to be understanding.
E: My best friend borrows things all the time and never gives them back. What would you do if you were me?
F: Everything will be fine. You just need to set some rules. Next time he/she wants to borrow something, say that you need it back in three days. If he/she doesn't give it back, then explain that you can't go on lending him/her things, because you need them. Remember, you set the rules for your things.
G: I've got a problem. My best friend's brother hangs out with the two of us all the time, which is annoying. What can I do?
H: If I were you, I'd talk to my friend and explain that although you like his brother, you like spending time with just him, because you may need to talk about something that you don't want his brother to know. I'm sure he'll understand.
I: My best friend made her own clothes, and thinks they are really cool. I think they're ridiculous. What should I do?

LISTENING TRANSCRIPT

Host Welcome back. As you know, it's Helping Africa Day today, so keep sending in those donations. Right now, we're going to Geoff who's at Milton School in Shrewsbury. He's talking to some more people who are doing different activities to raise money!

Geoff We're having fun! That's for sure!

Host Nice portrait by the way!

Geoff Thanks, but I'm not sure it looks like me. Everyone is doing something creative here at Milton School, as you can see. There are people doing arts and crafts, pottery and, of course, painting portraits, including me and Milton School's head teacher, Alan Taylor. Hello, Mr Taylor, how's it all going?

Mr T Great! Everybody's having fun and we've raised a lot of money.

Geoff Really? How much so far?

Mr T Well, the total at the moment is about 12,500 pounds, but we haven't finished yet.

Geoff Good luck. Now, over here we've got Steve Wilkins, a PE teacher. He's trying to break the record for raising the most money in a day. Well done, Steve!

Steve Thanks, but you have to make a donation, too.

Geoff Of course. Here you go.

Steve Thanks.

Geoff Good luck, Steve. OK, if we move the camera over here you can see a huge cake, and it's in the shape of Africa. Here's the school chef, Tom Richards. Is this a record breaker, too?

Tom No, it isn't. But it's the biggest cake I've ever made.

Geoff Did you make it by yourself?

Tom No. I've had lots of help from the students.

Geoff Well, I'd love to try some now. But I've heard someone quite special is coming to cut the cake. Is that right?

Tom Yes, but we don't know who it is.

Geoff I do, but I'm not telling. All I'm saying is, he's very famous. OK, back to you at the studio.

Host That's all very exciting. We'll be back to Milton School to see who turns up to cut the cake later. But now we're going to...

6 Speak & Write

- A. Aim:** to give Ss practice in using the vocabulary, structures and functions of the lesson through an oral activity

- Draw Ss' attention to the topics and ask them to read the speech bubble.
- Point out that they should use the ideas given as well as Conditional Sentences Type 2.
- Get Ss to do the activity in pairs or small groups. Go round the class helping them when necessary.

Suggested answer

A: If countries worked together, there would be peace.

B: And also if they stopped wars, and started discussing their differences, this would be a better world.

A: I agree. Instead of fighting, we could respect other countries.

B: What about the environment? What could we do?

A: We could do a lot of things. If we used bikes instead of cars, planted more trees and stopped pollution, we could make a great difference.

B: Maybe the governments could also take some measures, to move, for example, some factories away from the cities.

A: OK, what about health? How could we improve that?

B: I guess through the use of technology. Also, if we were informed, we could avoid some illnesses or know how to deal with them.

A: I agree. And the poor people in Africa?

B: If we raised money, we could support charity organisations. We could also volunteer or send medicine.

- B. Aim:** to give Ss practice in writing

- Allow Ss some time to write the sentences.
- Have Ss read out their sentences.

Suggested answer

The world could be a better place if each of us did a little something. We don't have to go to Africa to help poor people ourselves, but we could help charity organisations, raise money or send medicine. Also as far as peace is concerned, it's important to take action. If countries worked together, if they respected each other and discussed their differences, the world would be friendlier and peaceful.

The environment is also at risk. If we planted trees, used our cars less and stopped pollution, the Earth could breathe again. Finally, human life is valuable. If we were more informed about health problems, we could avoid getting sick and we'd know how to deal with illnesses.

Harry Hi, Jim! I didn't know you were back from your trip.

Jim Yes. We came back yesterday.

Harry Really? How did it go?

Jim I had a really nice time.

Harry Was it your first time in Africa?

Jim No, I've been to Tunisia, but that was a different type of holiday.

Harry You're very adventurous, aren't you?

Jim Yes, but this time in Kenya we did a lot of waiting around before we saw anything.

Harry Really?

Jim Yes, it was the wrong time of year and, it was hard to see any big animals. However, I managed to take some really good photos.

Harry Did you take your brother's camera in the end?

Jim No, I bought one from the airport, a really expensive one. But it was worth it.

Harry Weren't you afraid of all the wild animals?

Jim Not really. Some lions made a lot of noise during the night, but they were too scared to go close to our tents. Actually something really funny happened involving an elephant.

Harry What happened?

Jim One morning I woke up and there was a lot of shouting. I looked out of my tent and there was an elephant trying to get into someone's tent. The guide told me it was looking for food. Anyway, it took them a while to get rid of it.

Harry I don't think I'd like to go on a safari.

Jim I loved it. In fact, I had such a great time that I'm going to go next year, too.

Harry You're crazy.

Suggested answer

About a month ago, I was in my grandfather's house in the village. It was the weekend and my grandfather was going to teach me how to fish.

We arrived at the lake early in the morning, and as the time passed, my grandfather felt sleepier and sleepier. In the end, he fell asleep on the boat and I continued fishing and enjoying the landscape. Suddenly, I caught a huge fish! It was fighting to free itself from the hook and I was trying not to let it escape. Before I knew it, I fell over the boat and into the cold water! Meanwhile, my grandfather had woken up and helped me get back on the boat.

Of course, I never went fishing again. It was an unforgettable experience, but not in a good way.

LISTENING TRANSCRIPT

Andrew

Well, I had spent ages planning my trip. The best beaches, the most luxurious hotel, everything was organised. But when I arrived, there was a problem I hadn't predicted, the weather. It rained almost every day. Luckily, there were lots of things to do in the hotel. On the last day, the sun came out and I spent all day by the pool trying to get a tan. I ended up red all over and couldn't sleep all night. A very unpleasant experience.

Rob

I booked my flight online. It was the first time so I was a bit nervous about making a mistake. Anyway, I got to the airport and I checked I had my passport, my booking details, my money and my suitcase. All was going well, until I heard the announcement. A three-hour delay. 'Oh, well,' I thought, 'what can you do?' But three hours turned into a whole day! It was a nightmare. I finally arrived a day late, and I was only staying for a long weekend. It ruined the trip.

Greg

I love sunbathing and I was really looking forward to spending a whole week in the sun. I didn't have much spending money with me, but that was OK, because all I wanted to do was sit by the pool and read the new book I had bought. Unfortunately, my dream didn't come true because my book was sitting at home on my desk, while I was on my holiday. I asked if I could borrow one from the hotel, but the books they had were terrible.

Mark

I'm usually very organised when I go away, maybe too organised. I make lots of lists for everything that I need, so I don't forget anything. My brother usually argues with me, but he knows I'm right. However, something went wrong on my last holiday. Everything seemed to be cheap there, so I bought lots of nice things. One day, I was at the market again and I realised what I had been doing. I hardly had any money left and I still had three more days to go. I was so angry at myself! It won't happen again, that's for sure.

B: Sounds horrible.

A: It was. What's more, my brother got sick and we stayed in the hotel for about two days looking after him.

B: How long was your holiday?

A: Five days. So, when he got better, there wasn't a lot of time left.

B: What about the city? Did you like it?

A: It's a pretty city, but we got lost twice and to top it all off, my dad lost his wallet and we didn't have enough money in the end.

In your advertisement, you mention extreme sports. Which exactly are available? What is more, can you tell me what the minimum age for sports is? My two young sons are joining me so I would like to know.

Thank you for your time. Please send me a reply as soon as possible.

Best wishes,

Suggested Pacing Chart for Full Blast 6

The weekly pacing chart on pages 73-79 has been created for a sixteen-week semester, in which the students have four sessions per week. Holidays have also been taken into consideration; therefore the total number of sessions has been calculated to be sixty-two.

So, 16 weeks x 4 sessions per week = 64 sessions **minus** 2 session for holidays = 62 sessions altogether.

Fourteen sessions are required for each module to be completed. Specifically, the sessions are as follows:

- 2 sessions (cover page and lesson a)
- 2 sessions (lesson b)
- 2 sessions (lesson c)
- 2 sessions (lesson d)
- 1 session (lesson e)
- 3 sessions (round-up – SB, WB, GB, project)
- 1 session (cross-curricular/culture page)
- 1 session (test)

Furthermore, the following sessions have also been determined:

- At the end of the semester:
- ✓ 2 sessions for the Consolidation: Modules 1-4
- ✓ 2 sessions for the Self-assessment section and remedial work before the Final Exam.
- ✓ 2 sessions for remedial work

Since the dates of holidays vary from year to year, the holidays have not been included in a specific week in the weekly pacing chart. Instead, the final week (week 16) is shown to have two sessions rather than four, thus reaching a total of 62 sessions (15 weeks X 4 sessions plus 2 sessions in week 16).

Abbreviations used in pacing charts

Ss = Students
p. = page
pp. = pages

NOTES:

Be sure to familiarise students with their book at the beginning of the first session.

Recommended homework for every session:

It is suggested that the Ss are asked to study the active vocabulary of each session.

Also, they should be given a few sentences from each session to copy and study for dictation.

In class:

Always check homework at the beginning of each session.

Make sure that students understand what activities they have to do for homework, as well as how they should be done.

When doing projects, have a few Ss present their work to the rest of the class. (Be sure to have a different student presenting each time so that all students are given the chance to present a project.)

There are two sessions missing from the week above which correspond to the sessions not done due to holidays.

Suggested Pacing Chart for Full Blast 6

(for Holy Qur'an Memorization Schools)

The weekly pacing chart on pages 80-84 has been created for a sixteen-week semester, in which the students have three sessions per week. Holidays have also been taken into consideration; therefore the total number of sessions has been calculated to be forty-six.

So, 16 weeks x 3 sessions per week = 48 sessions minus 2 sessions for holidays = 46 sessions altogether.

Eleven sessions are required for each module to be completed. Specifically, the sessions are as follows:

- 2 sessions (cover page and lesson a)
- 2 sessions (lesson b)
- 2 sessions (lesson c)
- 2 sessions (lesson d)
- 1 session (lesson e)
- 1 session (round-up – SB, WB)
- 1 session (test)

Furthermore, the following sessions have also been determined:

- At the end of the semester.
- ✓ 2 sessions for remedial work before the Final Exam.

Since the dates of holidays vary from year to year, the holidays have not been included in a specific week in the weekly pacing chart. Instead, the final week (week 16) is shown to have one session rather than three, thus reaching a total of 46 sessions (15 weeks X 3 sessions plus 1 session in week 16).

Abbreviations used in pacing charts

Ss = Students

p. = page

pp. = pages

NOTES:

Be sure to familiarise students with their book at the beginning of the first session.

Recommended homework for every session:

It is suggested that the Ss are asked to study the active vocabulary of each session.

Also, they should be given a few sentences from each session to copy and study for dictation.

In class:

Always check homework at the beginning of each session.

Make sure that students understand what activities they have to do for homework, as well as how they should be done.

Culture / Cross-curricular pages:

These are optional and can be given to Ss as extra reading practice at home or they can be done in class if time permits.
