1 Reading

- a Are you an only child? Or are you a first-born, middle-born or last-born child? Read paragraph 1 of the article, and then the paragraph that relates to you. Do you agree?

Does Birth Order Count?

Many factors determine our adult personalities. Could birth order be one of them? Psychologists are much in dispute about this, but many would argue that your position in the family pecking order could be a major influence on the type of person you are. Think of yourself, family and friends. To what extent would you agree with this summary of the effects of birth order on personality?

Only children:

- + You are keen on facts, ideas and details. You are responsible, and happy to take responsibility. You are task-oriented, conscientious and reliable.
- = But ... you don't like admitting you are wrong, and you can sometimes appear unforgiving and over-demanding.

First-borns:

- + Natural leaders and high achievers are more often than not first-borns. You are punctual, well-organized and competent, giving close attention to detail. You don't like surprises!
- = But ... you can be moody and sometimes lacking in sensitivity. Some people even find you bossy and intimidating since you push people hard and refuse to take 'no' for an answer. Also, you are poor at delegating.

Middle-borns:

- + You can see both sides of a problem, which makes you a good negotiator. You like to please people and, being calm, friendly and a good listener, you often succeed in this.
- = But ... you are less ambitious than the first-born and you are not very good at making decisions that might offend others. And you are too inclined to blame yourself for others' failings.

Last-borns:

- + You are strong on people skills. Being a natural extrovert, talker and entertainer you make friends easily. You are not afraid to take risks.
- = But ... you are easily bored and inclined to self-centredness. You have unrealistic expectations of relationships – you expect them always to be fun which, of course, they are not!

b Read the whole article and decide whether these statements are true (T) or false (F).

The article says that:

- Only children are good at being in charge. T
- 1 Only children sometimes ask too much of people.
- 2 First-borns are often late for appointments.
- 3 Some people are slightly scared of first-borns.
- 4 Middle-borns are good at settling arguments.
- 5 Last-borns always make safe decisions.
- 6 They are good at making lasting friendships.

2 Word builder: suffixes

a Make adjectives from the nouns and verbs in the box and complete the table.

respect	access	passion	thought	society	knowledge
response	delight	consider	beauty	terror	compassion

-able	-ible	-ate	-ful
<i>respectable</i>	<i>accessible</i>		

Language assistant

Remember that we can add *-ible*, *-able*, *-ate*, and *-ful* to nouns or verbs to form adjectives. Don't forget that there is sometimes a change in spelling: *sense – sensible*, *rely – reliable*; and sometimes not: *agree – agreeable*. Sometimes the base word changes completely: *eat – edible*. Check in a dictionary if you are not sure.

b Write a sentence to describe each of these people using some of the adjectives above or others with the same suffixes.

- 1 a parent

- 2 a relative

- 3 a good friend

- 4 a favourite teacher

2 A friend in need

Grammar builder: present tenses and time – general uses and special cases

Use:

Use the present simple for:

- habits and routines:
*We often **go** to the mall.*
- permanent situations:
*We **live** in Dubai.*
- facts:
*The sun **rises** in the east.*

Form:

Present simple = subject + verb

(+ *-s* or *-es* for third person singular)

I / You / We / They	go	to work by bus.
He / She	goes	
I / You / We / They	don't go	to work by bus.
He / She	doesn't go	
Do I / you / we / they	go	to work by bus?
Does he / she		

Use the present continuous for:

- actions happening now or around now:
*He's **playing** baseball right now.*
- temporary actions and situations:
*He's **living** in Japan for a few months.*
- changes and developments:
*The Earth **is getting** hotter.*
- planned future events:
*We're **meeting** next week.*

Present continuous = subject + *is / are* + *-ing* form

I / You / We / They	are (n't) feeling	very well.
He / She	is (n't) feeling	

1 Grammar

a Read the letter and underline all the examples of present tenses.

Dear Sam,

I'm writing to let you know how everything's going here. Right now I'm sitting in my new study, which faces the park. I don't normally work here in the mornings – I usually go to the office in town, but my boss is away right now so I'm spending a little more time at home!

Sue is enjoying the new house and is learning to use the computer. The kids are starting their new school next week. Right now they are all painting their rooms, which is keeping them nice and quiet.

This weekend we're having a barbecue with some neighbours. They live in a beautiful house not far away with a huge back garden – they even have a swimming pool! It might be too cold to swim this time but the kids are taking their swimming costumes to be prepared just in case.

We're all missing you and we talk about you often.

Looking forward to hearing from you,

Max

b Now write one example from the letter of each use of the tenses in the table.

Present simple	Present continuous
habits and routines _____	happening now or around now _____
permanent situations _____	temporary actions or situations _____
facts _____	changes and developments _____
	planned future actions _____

c Put a tick (✓) next to the sentences that are correct. Then correct the incorrect sentences.

- 1 I'm sorry, but I'm thinking you're wrong.
- 2 Without my glasses, I can't see at all.
- 3 Mmm! I smell fresh baked bread!
- 4 My new car is looking almost exactly like my favourite old car.
- 5 Noor is loving pizza. It's her favourite food.
- 6 Sami likes science, but he's thinking of studying law.

d Answer the questions about yourself using the appropriate present tense and time. Check your answers with the information in the Grammar builder on page 6.

- 1 Describe a daily habit or routine of yours.

- 2 Explain something that is happening now as you work.

- 3 Describe a temporary action or situation in your life.

- 4 Describe an action you have planned for the future.

- 5 State a true fact about yourself.

- 6 Express a permanent situation that involves you.

- 7 Explain something about yourself that is changing over time.

1 Word builder: words and phrases about communication

Look at these words and phrases about communication from your Student's Book. When you are trying to communicate effectively, do these phrases represent positive, negative or neutral ideas? Complete the table.

non-verbal communication distrust
 jargon let your mind wander
 keep an open mind maintain eye contact
 scratch your head facial expressions
 gesture posture yawn
 frown nod your head glare

Positive	Negative	Neutral
		non-verbal communication

2 Writing

a Think about effective communication and what you have learned in this unit. Look at the list of common barriers to effective communication below and provide a brief explanation or example for each one.

The most common barriers to effective communication:
 different backgrounds, different perspectives

Someone from a scientific field might not understand a sales person's perspective very easily.

1 language differences

2 jargon and specialized terms

3 background noise

4 emotional reactions

5 non-verbal communication

6 distrust of the information or sender

- b** Imagine you have been asked to write a report for your boss about communication problems at work and how communication could be improved. You should organize your ideas under several appropriate headings. Some examples are given to guide you. Use your ideas to write a report of approximately 150 words.

Language assistant

A written report is a way of presenting factual information in a brief, organized and semi-formal style.

Note to self: have a heading for each paragraph of a report

Introduction
The purpose of this report is to ... / The report is intended to outline ...

Communication breakdown
Communication can break down for many reasons. One way ...

Communicating more effectively
Communication can be improved by ... / Several ways of improving communication can easily be implemented ...

3 Grammar

- a** Complete the sentences with the correct form of the verb in brackets.

- 1 I don't mind _____ (help) you with your homework. Let's meet after class.
- 2 My brother is considering _____ (move) to Taif next year.
- 3 Steven threatened _____ (quit) the team after an argument with the coach.
- 4 Josh started _____ (feel) seasick five minutes after he got on the boat.

- 3 I have been dreaming *of / to* taking a holiday for months!
- 4 The weather is very hot here, but you get used *of / to* living with air conditioning.
- 5 Yaqub has been thinking *of / to* buying a new car this summer.

Unit 2 The best of the past

1 Local shop versus supermarket

1 Reading

a Look at the photograph on page 14 of your Student's Book. Tick (✓) five words that you think will be in the article.

food	<input type="checkbox"/>	economy	<input type="checkbox"/>	farmer	<input type="checkbox"/>
stallholder	<input type="checkbox"/>	consumer	<input type="checkbox"/>	environment	<input type="checkbox"/>
local	<input type="checkbox"/>	friends	<input type="checkbox"/>	imported	<input type="checkbox"/>

b Read the article quickly and check your answers.

Since the 1960s, UK supermarkets have gradually developed an almost total stranglehold on the food market. Immediate losers in this process were Britain's farmers. The supermarkets could determine what they grew, how they grew it and, above all, they could set the prices. Moreover, the farmers were up against readily available and cheaper imported foodstuffs. Half of all the vegetables and a staggering 95% of the fruit consumed in the UK were not actually grown there.

This situation was, in large part, created by consumer demand – cheaper imported meat and all year round availability of fruit and veg which was once seasonal.

The farmers themselves decided to counter this monopolistic trend – by dealing straight with the customer and cutting out the middleman, i.e. the supermarket. How? By setting up local Farmers' Markets.

Says Wendy Sawyer, a sheep farmer from Wales: 'Farmers' Markets sell fresh, local food in

abundance, all competitively priced. The customers have direct contact with the producers and the stallholders can tell them where and how the products they sell are farmed or processed. Also, by shopping at Farmers' Markets the consumer knows that he or she is promoting the viability of the local economy.

'And there is an equally important hidden advantage. Food miles! Just think of the CO₂ emissions it takes – and thus the effect on climate change – to fly lamb from New Zealand or beans from Kenya. The shopper knows that, at a Farmers' Market, all the produce comes from the locality and the food miles involved are minimal.'

Farmers' Markets are developing rapidly. They started with fruit, vegetables and meat, but now, at most local markets, you'll find fresh fish, bread, cheese, cakes and jam – even healthy ready meals.

'So you're not just protecting the environment by shopping at one of our markets – they're *fun*, too!' smiles Sawyer. 'You can meet up and chat with your friends!'

c Read the article again and answer the questions.

Who more or less totally controls the selling of food in the UK?

The supermarkets.

1 Where do most fruit and vegetables eaten in the UK come from?

2 Who, apart from the supermarkets, was responsible for the situation?

3 What are 'food miles'?

4 Why are Farmers' Markets helping to protect the environment?

d Look at the examples in the text in exercise 1b. Try to guess what they mean from the context.

Write a short definition.

total stranglehold on the food market total control of the selling of food

1 the farmers were up against _____

2 a staggering 95% _____

3 processed _____

4 promoting the viability _____

5 the produce comes from the locality _____

e Now use a dictionary to check your definitions.

2 Writing

Think of your favourite market. Write a paragraph about what is sold and why you like shopping there. Are there any disadvantages?

2 Heroes past and present

Grammar builder: the past

Use and form:

- To describe a setting
 - a) the past simple: *It **was** a stormy night.*
 - b) the past continuous: *The sun **was setting**.*
 - c) *there was / were: **There was** no one on the streets.*
- To describe actions or events
 - a) the past simple: *Lightning **struck** the house.*
 - b) the past perfect: *They **had gone** to bed three hours before the fire started.*
 - c) the past continuous: *They **were sleeping** when the fire started.*
- To talk with different degrees of certainty about a person or situation
 - a) *must have: It **must have** rained, since all the streets are wet.*
 - b) *may / might have: That noise **may have** been the wind outside.*
 - c) *couldn't have: It **couldn't have** been the cat because she's right here.*

1 Grammar

- a Complete the text about Abdul Rahman with the past simple, past continuous, or past perfect of the verbs given in brackets.

The slave who kept his faith

Abdul Rahman Ibrahim Sori was a prince from Futa Jallon, modern-day Timbuktu. He was a civilized, educated man who spoke (*speak*) English and was knowledgeable in maths and science. In 1788, at the age of 26, while he (1) _____ (*serve*) in his father, King Sori's, army, he was captured and sold to European slave traders. His captors (2) _____ (*transport*) him by slave ship to New Orleans, where one Thomas Foster, a plantation owner from Natchez Mississippi, (3) _____ (*buy*) him. Abdul Rahman was a lost man in a far and, by his standards, uncivilized land. When he claimed that he was a prince, people (4) _____ (*laugh*) at him, and after he (5) _____ (*suffer*) the indignities of plantation work for a short while he (6) _____ (*realize*) he only had his Islamic faith to support him. Keeping to Islamic standards of cleanliness, regular praying and fasting were all difficult with the hard work and long hours on the plantation, but Abdul Rahman (7) _____ (*maintain*) his faith. The Fosters (8) _____ (*grow*) to respect him and allowed him freedom to follow his beliefs. Finally, in 1828, with the help of the editor of the *Mississippi State Gazette*, who (9) _____ (*hear*) the story of his background some years earlier, he (10) _____ (*gain*) his freedom. While he (11) _____ (*tour*) the American states, he (12) _____ (*meet*) President John Quincy Adams, and returned to Timbuktu the following year only to die five months later. In all those years he never once relinquished his faith.

b Read the text and complete the deductions below. Use *must, may, might* or *couldn't* + present perfect.

Abdul Aziz bin Abdul Rahman, King of Saudi Arabia, is known as the outstanding Arab leader and hero of his time because he united the different tribes in Saudi Arabia. However, until 1902, Abdul Aziz lived in exile. His family fled, first living with the Bedouin in the desert and then, finally, settling in Kuwait.

In 1901, when Abdul Aziz was 25, he set out to take Riyadh with a small band of about 40 followers. It was a bold and courageous plan but extremely risky as he had so small a force.

They arrived in Riyadh in 1902, scaled the wall and killed the Emir. People say that perhaps the army was so demoralized by the unexpected attack that they surrendered without resistance. Abdul Aziz then secured the walls and asked his family to join him.

Then, with a combination of political judgment and eloquence, Abdul Aziz slowly persuaded the different tribes on the Arabian Peninsula to unite. He married many times into different

tribes. He gained loyalty from other countries in the Gulf, such as Jordan, and the British, by building strong ties and making agreements to protect each other's borders. Finally, with international recognition and support, Abdul Aziz conquered nearly all of the central Arabian Peninsula and, in 1932, became King of Saudi Arabia.

Abdul Aziz and his followers must have had superhuman qualities.

- 1 Abdul Aziz _____ a lot from the Bedouin while in exile.
- 2 Abdul Aziz and his followers _____ very courageous to attack Riyadh.
- 3 Some people say that the army of the Emir in Riyadh _____ so demoralized that they surrendered without fighting.
- 4 Abdul Aziz _____ very good political judgment to persuade so many tribes to unite.
- 5 Abdul Aziz _____ without international recognition and support.

Frank Lloyd Wright

Frank Lloyd Wright is arguably the twentieth century's greatest architect. His career spanned (1) _____ seventy years, from (2) _____ 1880s to the 1950s. He was a prolific worker and designed 1,141 buildings, of which 532 were built and 409 still stand today. Lloyd Wright designed a wide range of (3) _____ buildings, from public buildings to houses. These buildings were constructed in different US states and a few were also constructed in (4) _____ Japan, England, and Canada. Twenty of these buildings are currently open to the public, for example the Guggenheim Museum in New York. Lloyd Wright believed that people are affected by (5) _____ buildings they live in. He was greatly influenced by (6) _____ power of nature and this was reflected in his designs and his choice of (7) _____ building materials. He manipulated brick, stucco, wood, plaster, stone, concrete and copper in a way that had never been done before.

Lloyd Wright did not design only (8) _____ outside of buildings; he also designed their insides. He believed that the exterior and interior of buildings should be similar, and should move naturally from each other. Well-known styles of houses designed by Lloyd Wright are (9) _____ Prairie style of the early 1900s and (10) _____ Usonian style from the mid 30s until (11) _____ Lloyd Wright's death. The prairie house was a long, low building with an emphasis on horizontal lines. The Usonian style developed from the Prairie style and was designed specifically as (12) _____ low-income housing. Other examples of Lloyd Wright's style are Shingle style and Chicago School.

Unit 3 Into the future

1 Future shock

1 Reading

a Read the article and tick (✓) the sentences T (true) or F (false).

Small is beautiful

Today many world thinkers are concerned about the state of the planet – climate change, over-population, world poverty, the depletion of natural resources and so on. The more pessimistic among them would say that it is already too late. The damage is done.

But need we have arrived at this situation? Should we not have listened to the German-born British economist, Ernst Schumacher (1911–1977), who wrote a book, *Small Is Beautiful*, in 1973?

According to Schumacher, the writing was on the wall back in the 1970s. We were, he said, treating natural resources, such as fossil fuels, as expendable income,

whereas we should have treated them as capital since they are not renewable. It was Schumacher who was among the first to advocate a return to smaller-scaled economic structures such as locally grown food for local use. Rather than striving for more and more sophisticated growth, we should aim for the introduction of what he called 'intermediate technology' – technology that can be easily purchased and used by poorer people. He predicted that a world that relies on the beliefs 'growth is good' and 'bigger is better' is a doomed world – and many would agree that, since 1973, he has been proved right. At last, however, people like the Nobel Prize winner Mohammad Yunus are being credited for their work

in areas of which Schumacher would have approved.

As he himself once said: 'Man is small, and, therefore, small is beautiful.'

- 1 All world thinkers think that it's too late to do anything about the world's problems.
- 2 Schumacher said that we ought to be more careful with natural resources.
- 3 He believed that poor people should have more control over the technology they use.
- 4 Schumacher approved of Mohammad Yunus.

3 Biosphere

1 Reading

a Read the article quickly. Does the story have a happy or an unhappy ending?

Lost in the jungle

In February 2007, two Frenchmen, Guilhem Mayral and Loïc Pillois, set off into the Amazon jungle in French Guyana. Their destination was Saül, a remote settlement nearly 200 kilometres away. Their progress was slow and difficult and, on the twelfth day, they had run out of food and realized that they were lost. Guilhem and Loïc determined that their best course of action was to stay where they were and wait to be rescued, since there was bound to be a search.

It was the rainy season, so they had no problem with water. They had a fire, which Loïc never let go out, but food? What to do about food? At first they started with plants. They chose plants that didn't look poisonous, one of them would eat a little and, if he was still alive the next day, they knew that it was safe. Then they also ate insects which they boiled first.

They sometimes heard helicopters overhead, but they could neither see the machines nor be seen because the jungle was so thick. Then, after about 40 days, the helicopters stopped coming. The search must have been called off.

The two men were now desperately close to starvation, so they decided to abandon camp and began to walk westwards in the direction they thought Saül might be, until the day when Guilhem ate a poisonous spider. Realizing how ill his friend was and the danger that he was in, Loïc set off into the jungle by himself.

The next day, Guilhem heard a helicopter. Loïc had found help! When he was rescued on April 5th, the two men had been in the jungle for 51 days – and they were just four kilometres from Saül.

b Now read the article again and answer the questions.

1 Why did the men decide to give up their journey through the jungle?

2 How did they discover what plants were safe to eat?

3 Why were they not rescued at first?

4 Why did they abandon camp?

c Match the words or expressions from the article with their meanings.

2 Reading

a Look at the photograph and select a caption. What topic do you think it illustrates?

- 1 A good day at work
- 2 Free as air
- 3 A winter's day

b Read the article quickly. Was your choice of topic correct?

Ordinary and extreme sports

Can you tell the difference between ordinary sports and extreme sports? What makes a sport 'extreme' is taking it to the absolute limits. We've all heard of bungee jumping, skydiving, rock climbing, freestyle snowboarding. What they all have in common is that they challenge the participants and take them close to the edge. But these are nothing compared to BASE jumping. BASE stands for Building, Antenna, Span (bridges), and Earth (cliffs) and is a very intense form of skydiving. Whereas skydivers use large parachutes to jump out of a plane at approximately 4,000 metres, BASE jumpers leap off buildings, antennas, bridges, or cliffs as low as 40 metres

high, with only a small parachute on their backs. BASE jumpers have been known to seek out well-known landmarks to jump off. The Eiffel Tower, Table Mountain, the Golden Gate Bridge, the Empire State Building, the Statue of Liberty, the Leaning Tower of Pisa ... all are irresistible to jumpers in pursuit of the ultimate experience.

The 'sport' is illegal in many countries, so jumps often have to take place in the middle of the night. Deaths sometimes happen and injuries occur frequently. Nevertheless, extreme sporters are not deterred by the danger. The greater the risk, the bigger the thrill and the stronger the exhilaration.

c Read the article again and answer the questions.

Why do people choose to do extreme sports?

Because they are looking for a challenge and adventure.

1 Why is rock climbing an extreme sport?

2 What is the basic difference between skydiving and BASE jumping?

3 Which of the BASE elements does the Burj al Arab in Dubai fall under?

4 According to the article, what makes BASE jumping dangerous?

d Find phrases in the article that mean the same or nearly the same as the following.

3 The career view

1 Reading

a Read the headline. Do you think that the article is about:

- 1 watching tennis 2 sports psychology 3 how to enjoy sport?

b Read the article. Were you correct?

Keeping the mind on the ball

As the financial rewards for winning at sports increase, so do the number of experts who form athletes' support teams. High on the list is the sports psychologist. Athletes with the correct mental approach to their sport can, it is believed, gain the edge over their opponents.

Key to an athlete's success is knowledge of, and control over, the 4Cs – Concentration, Confidence, Control and Commitment.

Concentration: the ability to focus on the task at hand. Distractions from concentration can range from the weather to anxiety and fatigue. Different athletes need different types of concentration – some for sustained periods (e.g. long-distance runners), some in short bursts (e.g. golfers).

Confidence: athletes need to be confident that they can achieve the necessary goals, and to be able to keep

going even when things are not going according to plan. **Mental imagery** – for instance, visualizing a previous good performance – is encouraged.

Control: it is important that athletes maintain emotional control. Anxiety, for instance, while in some ways a good thing before an event, should not be allowed to affect performance, while anger can often lead the athlete to focus more on the subject of the anger than on the business of winning.

Commitment: athletes need to persevere with rigorous training, maybe over many years. Commitment to the sport will almost certainly compete with other commitments – family, work, studies and so on. It can be undermined by injury or perceived lack of progress. The coach, medical support team, friends and others can help maintain an athlete's commitment.

c Read the article again. Tick (✓) the sentences T (true) or F (false).

Athlete's support teams are becoming smaller.

T F

1 The weather can help an athlete concentrate.

T F

2 All athletes should play football.

T F

3 Anxiety can sometimes be positive.

T F

4 Athletes should give up all other commitments.

d Find words or expressions in the article that mean:

long sustained

1 be slightly better than _____

2 for short periods _____

3 seeing in your mind _____

4 state of being worried _____

5 continue regularly _____

6 imagined _____

Grammar builder: types of relative clauses

Use:

- Use a defining relative clause to define or specify who or what we are talking about:

*Lions are animals **that live in Africa.***

- Use a non-defining relative clause to add information about a person or thing. This is separated from the main clause by commas and the sentence would still make sense if the clause were omitted:

*The players, **who were really tired,** decided to go home.*

Form:

Defining relative clause: main clause + (relative pronoun) + relative clause:

*Ahmed is the only student in our class **who got an A grade in his exam.***

Non-defining relative clause: main clause, + relative pronoun + relative clause:

*Mark attributes his success to his parents, **who were right behind him all the way.***

It is not always necessary to use a relative clause to specify what we are talking about. We use modifying phrases to make contact clauses as another way of doing this:

*Lions are animals **living in / found in Africa.***

Modifying phrases

- *ing* form: *Can you see the man **sitting near the window?***
- past participle: *He's the man **married to my cousin.***
- prepositional phrase: *How much is the pair of trousers **in the window?***

2 Grammar

a Join the two sentences to form one sentence with a non-defining relative clause.

1 Mark was good at languages at school. Mark now studies Arabic at university.

2 Alex plays basketball and football extremely well. Alex is a naturally talented athlete.

3 Ahmed Shawqi became my favourite author at school. Ahmed Shawqi was a famous writer.

4 Football is a sport played all over the world. Football requires speed and endurance.

5 Tennis is an intensive sport. Tennis can cause serious injuries.

b Cross out one or two words in each sentence where possible to make contact clauses.

1 The man who is managing our company now is very experienced.

2 The man who is talking to the journalists was a government minister in the 1990s.

3 The people who are sitting at the back of the room can't hear the speaker.

4 Passengers who are travelling to London should go to Gate 12.

5 The flowers that are growing in the park are very colourful this year.

2 In fashion

1 Reading

- a Look at the headline and the picture. What do you think the article is about?
 b Read the article. Were you correct?

Fashioning the past

Fashion in Ancient Egypt was mainly designed for comfort in the hot, dry desert climate and clothes were generally made of linen. Male outfits usually included a kilt. The kilt was used to serve a variety of purposes, such as indicating the age and status of its wearer.

Ancient Egyptian haute couture for women typically included a straight kaftan or shift. This changed very little over the centuries.

Footwear did not feature as a high priority in Egyptian fashion. Those who could afford them wore leather sandals. Others went barefoot.

The Egyptians did not, however, totally sacrifice elegance for comfort. Jewellery, for example, was extremely popular throughout the period. Excavations of tombs have shown that queens of Egypt were almost always interred with a quantity of jewellery. The amount of jewellery worn by individuals often indicated their social position and level of wealth. Jewelled collars were very popular and usually made of very brightly coloured gems. Rings, anklets and bracelets were also part of the normal fashion wear. Earrings were common among wealthy women.

Even the less well-off attempted to adorn themselves with as much jewellery as was possible. While not nearly as lavish, the jewellery of the common Egyptian was usually very brightly coloured and was made out of inexpensive materials such as pottery.

Grammar builder: different passive forms

Use:

Use the passive to shift attention from the doer of the action to the receiver. The passive is also used in more formal or more impersonal language:

*Passengers **are kindly requested** to read the safety information.*

Form:

Simple tenses: receiver + form of *to be* + past participle

Clothes **are** **designed** for comfort.
were by the Ancient Egyptians.

Continuous tenses: receiver + form of *to be* + *-ing* form + past participle

The product **is** **being marketed** by an advertising company.
was when they discovered the problem.

Perfect tenses: receiver + *have / has / had* + form of *to be* + past participle

The project **has** **been completed** at last.

b Underline all the examples of the passive used in the article in exercise 1b.

3 Selling the image

1 Reading

a Read the article, then answer the questions using a few words only.

... helps you work, rest and play

Magazines nowadays are crammed with advertisements for toothpaste, shampoos, designer clothes, healthy food and food supplements, all designed to make us look and feel better. If you watch the commercials on TV, rather than using them as an opportunity to get up and replenish your cup of coffee, you will notice that again, a large proportion of advertising time is taken up by attempts to sell this kind of product.

A number of different strategies or themes are often seen in this kind of advertising. One is the 'before and after' routine, in which two pictures of supposedly the same person are shown, one before and one after using the product, the contrast providing ample evidence of the miraculous improvement in

health and the quality of life. Then there is the scientific approach, which attempts to convince by using percentages and statistics and words like 'tested' and 'proven'. Many of these advertisements include or end with a catch phrase that is hard to get out of your mind and that you always associate with the product – at least, that's the theory. One of the best known of these, intended to appeal to the modern person's snacking habits in today's stressful world, was the oft-repeated slogan 'A chocolate bar a day helps you work, rest and play'. Think about it for a second and then tell me ... how can a calorie-rich chocolate bar improve your life in the areas of working, resting and playing?

Where can you see a lot of advertisements for healthy food and food supplements?

- 1 Which strategy uses two pictures?
- 2 Which strategy uses percentages and statistics?
- 3 What should a catch phrase be associated with?
- 4 What does the chocolate bar catch phrase appeal to?
- 5 Does it make sense? Why? / Why not?

b Find words or phrases in the article that mean the same as or something similar to each word or phrase.

- packed crammed
- 1 refill _____
- 2 efforts _____
- 3 apparently _____
- 4 enough _____
- 5 amazing _____
- 6 heard frequently _____

Grammar builder: use of active and passive

Use:

The passive is often used when we do not know who the subject is, or when the subject is less important than the verb or the object of the active sentence:

*They **are designed** for maximum effect.*

*It **has been said** that time is a great healer.*

2 Grammar

Look at these examples of the passive from the article in exercise 1a. Is it possible to put them in the active? If you think it is possible, rewrite the sentence in the active. You may need to supply a subject for the verb yourself. If you think it is not possible, leave the sentence in the passive.

Magazines are crammed with advertisements for food supplements.

Advertisers cram advertisements for food supplements into magazines.

1 The products are all designed to make us feel better.

2 A large proportion of advertising time is taken up by attempts to sell this kind of product.

3 A number of different strategies are often seen in this kind of advertising.

4 Two pictures of the same person are shown.

5 The catch phrase is intended to appeal to the modern person's snacking habits.

Unit 6 Looking forward

1 And the weather tomorrow ...

1 Reading

a Read the article. Can scientists predict the effects of *El Niño*?

El Niño

Meteorologists are beginning to understand how even localized climatic changes can have devastating effects many thousands of kilometres away. One such far-reaching phenomenon is *El Niño*.

El Niño is an abnormal warming of surface waters in the eastern tropical Pacific Ocean – off the coasts of Ecuador and Peru – which occurs every few years. This leads to increased evaporation of the sea water, with far-reaching and catastrophic effects on the world's climate. Scientists do not really understand how *El Niño* forms, but it is believed that it may have contributed to the 1993 Mississippi and 1995 California floods, heavy rains in South America, and drought conditions in southern Africa, Australia and Southeast Asia.

It is also believed that *El Niño* contributed to the lack of serious storms and hurricanes in the North Atlantic, which may have saved states like Florida from serious storm-related damage.

Unfortunately not all occurrences of *El Niño* are the same, and the atmosphere does not always react in the same way from one *El Niño* to another. This is why NASA's Earth scientists continue to participate in international efforts to understand the phenomenon. One day scientists may be able to provide sufficient warning so that we can be better prepared to deal with the changes that *El Niño* causes in the weather.

b Read the article again. Tick (✓) the sentences T (true) or F (false).

- 1 Local changes in the climate only affect nearby areas.
- 2 Sometimes the water temperature rises in the Pacific.
- 3 Not all the effects of *El Niño* are bad.
- 4 *El Niño* always follows the same pattern.

'Air-rage' case: Not guilty! Jury says passenger was defending self

A man was acquitted on Tuesday of breaking an airline ticket agent's neck during a scuffle in Newark, NJ, which has come to symbolize 'air-rage'.

Jurors deliberated for three-and-a-half hours before clearing John C. Davis, Jr. of aggravated assault. The verdict in Essex County Superior Court showed jurors believed that Davis, a steel plant worker from Fredericksburg, VA, acted in self-defence in the incident in July, 1999. Davis, 31, sobbed when the verdict was read. If convicted, he could have faced ten years in prison.

The dispute began when Davis and ten other family members began boarding a flight from Newark to Orlando on July 22, 1999, after a two-hour delay. They were on their way to Walt Disney World. Davis' wife, Victoria, testified that Continental Airlines ticket agent Angelo Sottile stopped her from retrieving their 18-month-old daughter, Kayla, who had wandered up a jetway.

Prosecution witnesses said an enraged Davis confronted Sottile for allegedly pushing Victoria, then picked the agent up and slammed him to the ground. Defence witnesses, including Davis and his relatives, insisted that Sottile attacked first by grabbing Davis' neck, and they both fell to the floor after Davis put Sottile in a head lock.

Sottile was in a coma for five days and has no memory of what happened. He has lost 80% of his neck mobility and now works part-time as a postal worker.

The Alice Springs Camel Cup

In July spectators flock to the Blatherskite Park in Alice Springs for the annual Camel Cup, the renowned Australian camel races. What started in 1970 as a friendly race between two old friends has grown into a full-scale carnival. There is no prize money, just trophies, and all the riders give their time free of charge. All the proceeds from the event go to local charities.

The day begins at 11.30 am with an opening ceremony and grand parade and races are run about every hour until the final trophy presentation.

The real stars of the day are the camels. They are temperamental, selfish and unpredictable. With as much order as can be mustered, the

unruly beasts are lined on the starting line by their fearless jockeys, the flag is dropped and they tear off at break-neck speeds. At least that's how it's supposed to work, but for each race you can guarantee that there are at least a few stubborn beasts who refuse to budge or amble off backwards to the distress of the jockeys and handlers! The unpredictable nature of these 'ships of the desert' makes for an interesting occasion with plenty of thrills and spills guaranteed for spectators.

There are loads of other attractions on offer, and the organizers promise a fun-packed day out for all the family.

How often does the Alice Springs Camel Cup take place?

Once a year.

1 How much money can the winning jockeys earn?

2 Who benefits financially from the races?

3 What is the signal for the start of each race?

4 Why are some of the jockeys not always happy?

5 Are the camel races the only events?

Book Club

Would you like to read a wider selection of books? Do you know a lot about Arabic literature but not much about English literature? Are you bored of the usual set texts at school? Join this club and learn how to interpret all types of text.

The Book Club runs after school from 3 till 6 every Tuesday. Each week we take turns to choose a new book or text on a particular theme. Then we discuss a new text.

The Book Club offers you free membership of our extensive library of books in both Arabic and

English. You can borrow up to three books at one time.

Every term we also offer a series of reading and writing workshops for club members at all levels, including:

- Beginners writing course: never written anything creative before? This course is for you!
- Poetry course: want to write a better ghazal or qasidah? This course is for you!
- Islamic literature: want to learn more about traditional Islamic literature? This course is for you!

The Book Club is particularly welcoming – come and make lots of friends with people interested in literature!

Grammar builder: adverbs and adverbials

Use:

Use adverbs and adverbials to qualify verbs and adjectives and give information about:

- how (manner): *He drove **carelessly**.*
- how often (frequency): *They **never** go out.*
- when (time): *They're getting married **next year**.*
- where (place): *The bathroom's **upstairs**.*
- how much (degree): *I **hardly** know him.*

Form:

Adverbs of manner are single words. They are usually formed by adding *-ly* to an adjective and they usually follow the verb.

Adverbs of frequency are single words. They usually precede the verb, except in the case of *to be* and modal verbs, which they follow.

Adverbs and adverbials of time and place can be single words or phrases. They usually come either at the beginning or at the end of the sentence.

Adverbs of degree are usually single words. They usually precede the verb, except in the case of *to be* and modal verbs, which they follow.

Paragraph 3: conclusion – propose a solution or an alternative to this activity.

3 Grammar

Complete the conversation with the appropriate conditionals (mixed and traditional).

A: Did I tell you I'm thinking of getting a pet?

B: Are you? What kind?

A: My son wants me to buy a horse, but I think it would be better to get a bird. Horses need too much care and attention.

B: Well, birds need care, too. Imagine, if you (1) _____ (have) a bird, you (2) _____ (not be able) to go away and leave it.

A: I suppose so, but if I (3) _____ (ask) my neighbours, I'm sure they (4) _____ (take care of) it.

B: I wouldn't be so sure. I went away for a week once and asked a friend to feed my parrot and he completely forgot! If he (5) _____ (not be) normally such a reliable person, I (6) _____ (not ask) him. But this time he really let me down.

A: What happened?

B: Luckily the neighbours heard this awful shrieking and called me. I had to cut my trip short. If I (7) _____ (not go) home immediately, I don't think the parrot (8) _____ (be) alive today!

1 Reading

a Read a young boy's letter to an advice columnist and answer the questions.

Dear Stuart

I have a really tricky problem and I thought I'd write and ask your advice.

It's about my neighbours. They have a donkey in their field. He's a beautiful animal, though he's getting on in years. But he's still very active. He used to have free range of the field but last month he escaped into our other neighbour's garden and made short work of all the flowers. Mrs Robson (she's the other neighbour) was ever so cross because her flowers were her pride and joy.

Now they've tied the donkey to a stake in a corner of the field. He looks so miserable and he's losing weight - he's only got a small area of grass and he's not getting enough to eat and he's all skin and bones. I want to report the owners to the police for cruelty, but my parents say that it would be unneighbourly. The poor animal is on my mind all the time and I don't know what to do. Please can you suggest anything?

Yours sincerely,

Jake Jones

What's the donkey like?

He's beautiful and he's active but he's getting on in years.

1 Why was Mrs Robson cross?

2 What did the donkey's owners do?

3 Why isn't the donkey eating enough?

4 Who doesn't want to involve the police?

b Look at these words and phrases from the article. Try to guess what they mean from the context. Write a synonym or a short definition.

2 Writing

Look at this reply to Jake Jones. The writer has not punctuated it or put it into paragraphs. Rewrite it to include punctuation and paragraphs.

dear jake thank you for your letter about your problem with the donkey it sounds like a very difficult problem and not one I would like to have to deal with myself but ill try to give you some advice first I think you should go and see your neighbours and offer to take the donkey for a walk around the field every day say that you would be very careful and make sure that you didn't let go of the donkeys rope you never know your neighbours might be grateful for the offer if they refuse to let you walk the donkey then i would phone your local donkey sanctuary and explain the problem I am sure they would handle the matter sensitively and there would be no need for your neighbours to know who had reported the matter i hope you find these suggestions useful and hope that you find a happy solution to your problem yours sincerely stuart

Welcome back cat

Salisbury City Hall (in England) has reinstated the post of 'Official City Cat' and appointed a two-year-old tomcat called Herbie.

Salisbury's outgoing Mayor, Jack Patten, welcomed the new recruit and helped settle him into his new quarters. The Mayor said: 'Salisbury has always had an official cat in the City Hall. When we closed for renovation and rebuilding last year, the last incumbent was retired to the country, but now we are open again, we are delighted to be able to adopt a cat from a local rescue centre.' He said Herbie had settled in well and enjoyed wandering around the council offices.

Cash-strapped Salisbury Council will not have to worry about the cost of caring for Herbie, as a unique sponsorship deal has been struck with the firm Pets at Home, who has agreed to provide food, veterinary treatments, and toys. The new mayor, Dick Penson, is a great cat lover and is looking forward to meeting up with Herbie when he takes office next month.

Why do you think Salisbury City Hall has an official cat? Maybe the cat catches mice in the building.

- 1 What happened to the last one? _____
